Abstract

This document provides the guidelines for preparing summaries for review and camera-ready papers for International Workshop on Vision, Communications and Circuits (IWVCC 2008). Please read carefully and follow the guidelines as closely as possible in order to produce high-quality proceedings with common formatting for all papers.

1. Introduction

Authors are kindly invited to submit papers describing original works in all aspects of vision, communications and circuits to IWVCC'08. Please prepare your summary according to the guidelines and submit via IWVCC'08 web site not later than **August 1, 2008**. **Only electronic submission of papers in PDF format is accepted**. After review, each corresponding author of the accepted summary will be requested to submit the **four page** final camera-ready paper in PDF format for the workshop proceedings no later than **September 15, 2008**.

2. Preparation of Abstract/Paper

2.1. Format

Please prepare your summary or paper in **A4** format (210mm by 297mm). Leave the top margin to 20 mm with the exception of the first page which begin 35 mm from the top edge. Set the bottom margin to 30 mm and the left and right margin to 20 mm. Text, figures, tables and references must be contained in a 170 mm by 237 mm area. All text must be in a two-column format with 5 mm column separation. The camera-ready paper should not exceed **four pages** in length. Please do not put page numbers on your paper.

2.2. Typesetting

Text should be written with a font size of 10 pt unless specified otherwise. Times New Roman font is recommended for consistency and readability both on screen and in print. **Please do not use Asian/local fonts** as this will make your manuscript unreadable for reviewers.

2.3. Title, Authors and Affiliations

The title of the summary/paper appears on the first page, centered over both columns and is set in 14 pt bold letters. The author names appear below the title in 12 pt. The affiliations should be given below the author names in 10 pt and contain full mailing address and email address.

2.4. Abstract

The paper should start with an abstract giving a short overview on the discussed matter and the presented results.

2.5. Section Headings

2.5.1. Typesetting

Section and subsection headings should appear in 10 pt bold face, while subsubsection headings in 10 pt italic face. The first letter of each major word must be capitalized.

2.5.2. Alignment

All the headings should be aligned left.

2.5.3. Numbering

Section, subsection and subsubsection headings should be numbered with Arabic numerals.

2.6. Equations

Equations are centered and numbered consecutively with Arabic numerals in parentheses as follows:

$$f(x) = \frac{ax + b}{x^2 + \alpha x + \beta} \quad (1)$$

2.7. References

A list of references should appear at the end of the paper. Number all references consecutively with Arabic numerals in square brackets. When referring to them in the text, type the corresponding reference number in square brackets as [1].

2.8. L^AT_EX Style File

For the convenience of L^AT_EX users, we provide a L^AT_EX style file `iwvcc08.sty` which automatically formats the manuscript in accordance with the workshop requirements. A L^AT_EX sample file `iwvcc08.tex` will show you how to use the style file, and a sample PDF `iwvcc08.pdf`. Since we do not provide a Microsoft Word template, please follow information described above.

3. Creating PDF files

3.1. Software

As mentioned above, only electronic submission of papers in PDF format is accepted. There are several methods for creating PDF files: Adobe Distiller, PDFWriter, `ps2pdf`, `dvipdfm`, `pdflatex`, and so on. Generally Adobe Distiller provides higher quality output than others, and is therefore preferred.

3.2. Embedding Fonts

All fonts must be embedded into the PDF file of your paper including the following standard 14 fonts:

- Courier
- Courier, Italic
- Courier, Bold
- Courier, Bold Italic
- Arial MT
- Arial MT, Italic
- Arial MT, Bold
- Arial MT, Bold Italic
- Times New Roman PS MT
- Times New Roman PS MT, Italic
- Times New Roman PS MT, Bold
- Times New Roman PS MT, Bold Italic
- Symbol
- ZapfDingbats

that come with Acrobat Reader, so that the file can be viewed correctly on any computer. The method of embedding fonts is different on various systems and PDF creation mechanisms; for example, in Adobe Distiller, choose Job Options and check Embed All Fonts. For authors using other software, please refer to your own help sources.

Before submission, **please make sure that all fonts are embedded into the PDF file you have created.** To view the font information for a PDF, open the file in an Adobe

Reader, go to the File menu, select Document Info, and then Fonts. The Font Info dialog box displays font information. If Used Font column is set to Embedded or Embedded Subset, it means that the font is correctly embedded.

3.3. File Protection

Please do neither password protect nor encrypt your PDF file so that we can insert headings, logo, and page numbers.

4. Submission of Papers

4.1. How to Submit

To submit your electronic manuscript, please visit the IWVCC'08 submission site at

<http://iwvcc08.is.tokushima-u.ac.jp/papers>

Firstly, you have to get an account for submission. Please follow instructions appeared in this web site.

4.2. File Size

File size is strictly limited to 10 MByte. Any file with the size bigger than 10 MB will be automatically rejected by the IWVCC'08 online submission system.

Acknowledgments

The authors would like to thank IWVCC'08 organizing committee members for their fruitful suggestions and comments.
